

Integromics develops state-of-the-art IT solutions for Life Sciences (Genomics and Proteomics) in two strategic areas: data management/integration and intelligent data analysis. Over the years, the company has developed a network of collaborations and partnerships with leading industry and academic organizations to provide complete technological solutions that enable scientists to make new discoveries from their research data. Integromics operates globally in Asia Pacific, Europe and USA. For more information: www.integromics.com.

Application Specialist

You are an experienced bioinformatician that enjoy meeting scientists, both in Pharma and Academia. You like to approach international customers and you are enthusiastic in presenting the latest software solutions. You are interested in listening to their needs, especially in the field of gene expression, Next Generation sequencing or Proteomics. Together with clients, you are capable to develop the best solution to meet their needs in data analysis and data management from the range of Integromics products as well as other third party products. In direct contact with the Technical Department, you like to be the technical side within the Sales and Marketing Department.

Some tasks include:

- Customer acquisition and follow up
- Technical presentations to prospects and in conferences
- Coordination of client feedback to R&D
- Manage product road maps and release schedules

Desired Requirements:

Excellent communication skills and fluent verbal/written English (other European languages especially French and Spanish are also a plus). A PhD or bachelor's degree in Bioinformatics or related field is desired.

Experience in microarrays data analysis and large-scale genomic datasets is a plus.

Previous work with our partners, Spotfire and Applied Biosystems is a big plus.

Location: Madrid Office, Spain

Please, send CV to rrhh@integromics.com and specify the code **AS09** for the position in the subject line.
